TIssueV2 - Bug #2126

exemption detail blank does not automatically match

11/09/2011 10:33 AM - Lauri Carpenter

Target version:			**Spent time:**	0.00 hour

Description

Use case:
- issue has exemptable detail with string type
- system is granted an exemption for this issue, with NO details (null)
- event is reported with NON-blank detail string

Expected/desired behavior is to EXEMPT the system. Actual behavior (v2_3 suite) is that event was created in Open state.

We probably need a wildcard "match anything" character for this situation to avoid ambiguity.

History

#1 - 11/09/2011 10:36 AM - Lauri Carpenter

We tried using ICONTAINS % and that does not work either -- this SHOULD work.

#2 - 11/09/2011 10:45 AM - Lauri Carpenter

Tried some other IIN and other combinations in integration and none of them worked; apparently, the string matching for string exemptions is NOT working. Continue investigation.

#3 - 11/09/2011 01:58 PM - Lauri Carpenter

- Status changed from New to Resolved

- Assignee set to Lauri Carpenter

No details on an issue exemption will make it a GLOBAL issue exemption (that is, independent of detail value entered on the event)

#4 - 11/11/2011 12:37 PM - Lauri Carpenter

- Status changed from Resolved to Closed
